

Comments to keep landlines:

a) I want to keep my *landline* for financial reasons and to make sure that I receive phone calls and messages that I may not be able to receive on a cell phone.

b) *We need landlines* for emergency preparedness, since mobile phones and VOIPs do not work during power outages.

c) *We need landlines* because the second anyone goes wireless, they risk interception. Hacking already endangers individuals, schools, banks, the health insurance industry, other businesses and governments.

d) *We need landlines* because the National Inst. of Health's National Toxicology Program study released on May 25, 2016, definitively shows that 2G cell phone radiation causes malignant brain and heart tumors and damages DNA. Pregnant women, children, people with medical implants and the infirm deserve the choice of using a corded landline telephone. The FCC and state legislators have fiduciary responsibilities to protect this choice.

e) I feel safer with a landline and I do not wish to expose myself to more radiation.

Thank you,
Janice Simmons
